Action produces structures and social reproduction takes place when action is habitualized; that is, when we develop social dispositions to act in a certain manner in familiar environments. This also means that even though the physical environment is the same for all of us, our habits structure it into different kinds of action possibilities.

The social structure of the Lion also affects the eating patterns for them. When a kill is made the females involved with it will eat first. What is left has to go through the hierarchy of the pride. There are some dynamics that can take place in the social structure of the Lion that we don't yet understand.
