Frontiers in Advanced Control Systems. by Ginalber Luiz de Oliveira Serra (ed.) This book pretends to bring the state-of-art research results on advanced control from both the theoretical and practical perspectives. The fundamental and advanced research results as well as the contributions in terms of the technical evolution of control theory are of particular interest.

Smart Systems are self-sufficient intelligent (sub-) systems with advanced functionality, enabled by underlying Micro- Nano- and Bio-systems and components. It allows to create a system out of components which is able to read the information from the surroundings, to process, to communicate signals and data with enabled feedback signal.

Robotic Control Systems is a new specialty section available through the community-run open-access journal Frontiers in Robotics and AI. The new section Robotic Control Systems is led by Specialty Chief Editor Prof Gianluca Antonelli from the University of Cassino and Southern Lazio, Italy. This section addresses control aspects of robotic systems.
