

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

• EXERCISE 16.1-1

Quasi-Fermi Levels of a Pumped Semiconductor.

(a) Under ideal conditions at $T = 0$ K, when there is no thermal electron-hole pair generation [see Fig. 16.1-3(a)], show that the quasi-Fermi levels are related to the concentrations of injected electron-hole pairs Δn by

$$E_{F_e} = E_c + (3\pi^2)^{2/3} \frac{\hbar^2}{2m_e} (\Delta n)^{2/3} \quad (16.1-8a)$$

$$E_{F_h} = E_v - (3\pi^2)^{2/3} \frac{\hbar^2}{2m_h} (\Delta n)^{2/3} \quad (16.1-8b)$$
